ACKNOWLEDGEMENT

It is with great pleasure, we present the second edition of the CAREER COMPASS Handbook, a comprehensive resource for the student community in Sri Lanka. This publication, initiated by IEEE SLInspire, a project under the auspices of IEEE Young Professionals Sri Lanka in collaboration with SL2 College, reflects our commitment to improving the education system in Sri Lanka and equipping students with the necessary skills and knowledge to succeed in higher education and the workforce. This booklet contains the important information on the higher education opportunities in Sri Lanka.

We extend our heartfelt gratitude to all who have made this project possible through their contributions, including volunteering time, expertise, and resources. Your support has been instrumental in our efforts to align with the United Nations SDGs, build a supportive community of students, educators, and professionals, and provide students with the guidance and resources they need to succeed. We are dedicated to supporting and empowering students as they navigate their academic journey, and this CAREER COMPASS handbook is a testament to our commitment to their success.

1. ABOUT US

IEEE Young Professionals Sri Lanka

IEEE Young Professionals Sri Lanka (IEEE YP SL) is a part of the global network of IEEE Young Professionals. It consists with young professionals working in the technology field including junior academic staff of universities and postgraduate students.

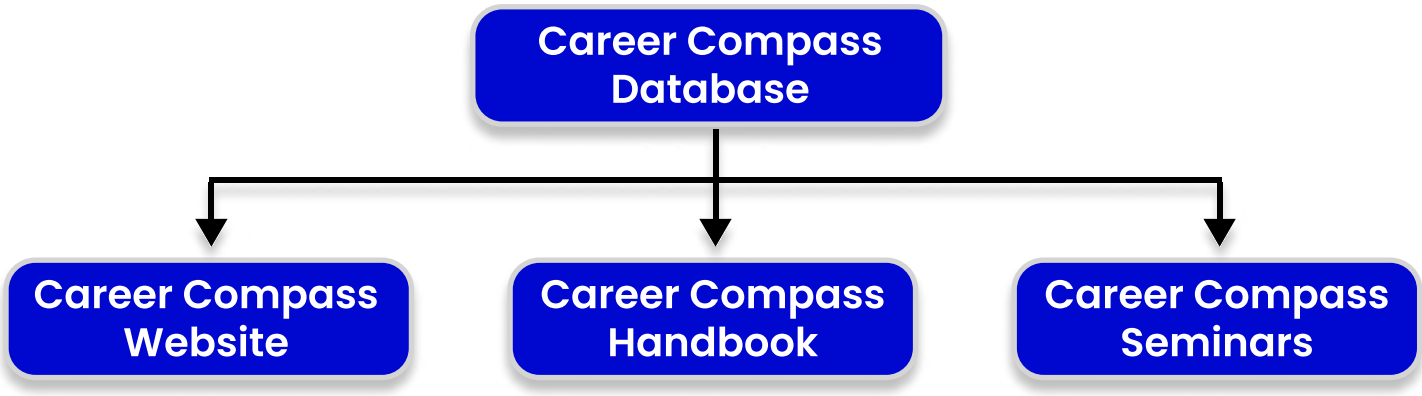
SL2 College

SL2College is an educational nonprofit organization formed in 2005. The goal of SL2College is 'to help Sri Lankan students with their higher education goals by providing information and guidance as necessary'. SL2College provides a platform for people to share their own experiences so that the students who plan to pursue higher education can learn about the best local and foreign choices available to them. SL2College has built a vast network of ambassadors in Sri Lankan universities in order to promote higher education and act as mentors to high school students interested in pursuing higher education.

IEEE SLInspire

IEEE Sri Lanka Inspire (SLI) is a national project by IEEE Young Professionals Sri Lanka in collaboration with SL2 college, that focuses on providing advice, knowledge, guidance, and motivation for students in the education sector to make a proper selection when moving toward higher education to raise themselves to achieve a successful career path through research, advocacy, and policy recommendations, ensuring students are prepared for higher education and the workforce of the country. To achieve that vision, SLI aims to build a strong community among the student communities, especially the school students who are currently at their peak in school education, those engaging with O/Ls and A/Ls, students who have been selected to universities and all other educational strategies to ensure equal access to educational opportunities for their journey of higher education, making the educational system of the country more effectively and efficiently.

SLInspire Career Compass



Career Compass Database

To overcome this lack of awareness and knowledge waste in the student population, SL inspires built a degree database consisting of more than 400+ public-sector university programs and 1200+ private-sector degree and tertiary education programs. This data is made available to the students via the career compass website and the career compass handbook. The career compass handbook and the career compass website will be extensively used in our seminar and webinar series and they will be freely available on our websites as well.

Career Compass Seminars

Islandwide mentoring sessions for students inspired by the career compass database to find the best matching career pathways for them and how to work on achieving their dream opportunities. They will be informed about their options so that they can arrive at a decision that best reflects their ambition. The seminar series will be conducted all around the country physically or virtually, covering all the rural areas where students are only aware of the traditional career paths. This will pave the way to quality education and equal opportunities for everybody. Further to that, no opportunities would be lost for them due to poverty, allowing them to rise up from the economic situation they were born with.

Career Compass Handbook

A comprehensive, easily readable, printed version of the degree database in a booklet of recognized higher education programs available in Sri Lanka, will be distributed while physical career guidance sessions. The career compass handbook also is available for free on the SLInspire website.

Career Compass Web

A user-friendly online platform that facilitates the discovery of recognized higher education programs in Sri Lanka. This is an interpretation of the career compass database. In the career compass website, from the start, the home page directs students to the Explore Options page, which filters students' inputs based on their present education qualifications. Next, the student has a selector including the subject area in which he or she desires to take the A/L exam or completed the A/L examination. Thereafter students have the option to select their preferred study field. It comprises a variety of fields such as engineering, design, construction, computer science, information technology, etc. Then, as another filtering option, students can choose an institute where they want to study. Finally, the students can see the filtered details on private and public programs in which students can enroll.
